

National Tour to Build **PEOPLES POWER**

**ENDLESS WARS &
THEIR ROOT:
CAPITALISM**

Peoples Power is the common theme uniting diverse individuals and organizations in a national discussion and tour.

Join us beginning in:

- NYC **March 11**
- Philadelphia **March 12**
- Baltimore **March 13**
- LA **March 18**

**HOUSING,
EDUCATION,
END ALL
SOCIAL
INEQUALITIES**

**FIGHT
FOR JOBS**

This tour will . . .

- 1) Encourage a nationwide discussion on developing a PEOPLES POWER program demanding jobs, housing and education, an end to all social inequalities including racism, sexism and LGBTQ oppression, the massive deportations and imperialist war. Let's target the root of these ills — the capitalist system — and the need to end this brutal system of exploitation;**
- 2) Call for participation in a national Speak-Out on capitalism's crimes of unemployment, low wages, foreclosures, police and ICE terror, racist incarcerations, hunger and homelessness. This is devastating millions worldwide. Schools, post offices, hospitals, clinics and housing are being destroyed to guarantee corporate profits. Millions of people are laid off and thrown away.**

Only mass pressure from the streets can bring the change that is desperately needed.

THE NATIONAL TOUR FOR PEOPLES POWER will discuss a fighting program and participation in many upcoming struggles — such as:

- ▶ **Sat MARCH 17 2 pm** ● **Community-Labor United for POSTAL JOBS & SERVICES RALLY & MARCH**, NYC Main Post Office 32 St. & 8th Ave.
- ▶ The annual massive ● **MAY DAY – Day without the 99%** Marches on May 1st around the country for worker & immigrant rights.
- **National opposition to the NATO/G8 meeting** of war criminals and the international 1% in Chicago. **Peoples Summit MAY 13 & 14, Mass March MAY 19**

New political space has opened due to the momentous eruption of the Occupy Wall Street Movement and its slogan "the 99% vs. the 1%." This movement continues despite massive repression organized by Homeland Security.

To respond to this repression and fight back, a People's Struggle for our basic needs and rights, with a program appealing to all workers, especially workers of color who face disproportionate levels of poverty, homelessness, unemployment and repression, is needed.

The rich get richer. They continue to put profits before people and attack what's left of the social safety net. We need a struggle for People's Power to win our basic rights.

The National Tour on building PEOPLES POWER will begin this discussion. It will not just be in union or community halls, it will also be in the streets. We have to march and demonstrate during this election year, to expose the lie that politicians represent the people's concerns.

- The pro-war, pro-Wall Street agendas of the two corporate parties at the **Republican & Democratic Party Conventions in August and September 2012**
 - ▶ The occupation movement and struggles all around the country including ● **MUMIA ABU JAMAL on April 24th in D.C**
 - ▶ Many, many other local events and peoples struggles. **Let's hear from you!**
- Open Mike for Testimony on Local Struggles & Issues**

Only mass pressure from the streets can bring the change that is desperately needed.
